

BaaS Backup as a service

Provide reliable protection for your data and your business!

Neterra.Cloud offers a next-generation backup solution: You can use it for physical servers, virtual machines, regular workstations, Office 365 or G Suite workstations, mobile devices, and websites.

Advantages

- ▶ **Safety** through a reliable copy for recovery.
- ▶ **Accessibility** from anywhere at any time.
- ▶ **Privacy** through control over visibility and access.
- ▶ **Authenticity** by proof that duplicated data is an exact replica of the original.
- ▶ **Security** via protection against malicious cyber threats.

The service includes

- ▶ **Ransomware protection**
Avoid downtime by actively protecting files from unauthorized modification and/or encryption.
- ▶ **Universal Restore**
Minimize expensive downtime by restoring Windows and Linux systems to dissimilar hardware, including bare-metal physical, virtual, or cloud environments.
- ▶ **Automated Bare-Metal Recovery**
Reduce recovery time of critical systems by automating and orchestrating the recovery.
- ▶ **Block-Size Deduplication**
Reduce disk storage capacity utilization and network bandwidth with efficient deduplication.
- ▶ **Centralized Web Management Console**
Reduce IT's workload with web-based management console.
- ▶ **Incremental Fast Backups**
After the first backup is complete, backup new or changed things only.

Where are your archives kept?

Your information is stored in Neterra's own data center in Sofia - SDC:

S.DC
SofiaDataCenter

- ▶ Tier III class data center
- ▶ 24/7 access control
- ▶ Live security and video surveillance
- ▶ Uninterruptible power supply and air conditioning
- ▶ Award-winning global connectivity just one cross-connect away

Levels of protection

- ▶ Proactive protection: Including vulnerability assessment, update of programs and systems, patch management and configuration.
- ▶ Active protection: Including malware and ransomware protection based on artificial intelligence and machine learning, system behavior monitoring and self-protection.
- ▶ Reactive protection: Guaranteeing fast, automated backup, migration and disaster recovery.
